**General Comments**

Ice buildup observed on the floor in walk-in cooler. The ice should be removed daily to prevent a trip/fall hazard. The ice was not observed on the fan units during this inspection (on floor only). Remove ice buildup daily. The source of the buildup should be identified and addressed. The ice accumulation on the floor was observed during the previous 2 routine inspections.

The walk-in freezer door and walk-in cooler doors will not close without manual assistance. Ensure that kitchen staff are aware that the door must be closed completely. The manager has posted signs on the outside of the freezer door to remind employees to close the door completely after each use.
